## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3754

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 9 and 14-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams (5,221,026). Williams discloses an apparatus for spraying liquid and gas including a liquid 24 and gas 32 container 20, a spray gun 16, a trigger 150, a connection line 14, and a fitting 43, 45. In regard to claims 3 and 4, Williams discloses the use of an isolation or check valve and an air bleed or release valve on col. 4, lines 35-38.

3. Claims 1-3, 7, 8, 12, 13 and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Jacques (2004/0069817). Jacques discloses an apparatus for spraying liquid and gas including a liquid and gas container 12, a spray gun 42, a trigger 54, a connection line 68, 70, and a fitting 28, 34 or 114. In regard to claim 3, Jacques discloses that the check valve can be in the fitting in paragraph 28, lines 25-29. In regard to claim 7, Jacques a gas flow valve in the fitting 36.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5-8, 11-13 and 18-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Williams (5,221,026) in view of Jacques (2004/0069817). Williams discloses a sprayer substantially as claimed but does not disclose a gas flow control valve in the fitting. However, Jacques teaches another sprayer having a gas flow control valve in the fitting for the purpose of attaining a finer control of the gas flow. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the sprayer of Williams with a gas flow control valve in the fitting as, for example, taught by Jacques in order to attain a finer control of the gas flow.

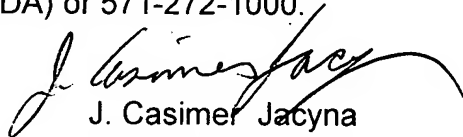

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brooks and Andres teach other sprayers.
